

**Some Recent Customer Feedback:**

**"I expected the worst,** but it turned out there was no need to worry. PowerCheck found and pointed out a few real fire hazards in my old home. Easy to fix. I am so glad that I went to PowerCheck!"  
—Vancouver, BC

**"I didn't think an electrical check-up was necessary.** House electrical system has never had a problem. I am so happy PowerCheck came, as there were several electrical hazards that I wasn't aware of. They were inexpensive to fix. Great service!"  
—Vancouver, BC

#300 – 3665 Kingsway, Vancouver, BC V5R 5W2

### Frequently asked questions

1. **How long does the *Home Electrical Safety Assessment* take?** Average time: 90 minutes
2. **Can I obtain "low-risk" rating with original "knob-&-tube wiring" in my home?**  
Absolutely, if the "knob-&-tube wiring" is confirmed safe by PowerCheck. If there are any safety concerns, PowerCheck will identify where the issues are. Once they are repaired and any issues addressed, the home will be re-rated at the appropriate lower risk.
3. **Following upgrade repairs, does the home need to be re-inspected by PowerCheck?**  
No. Providing the document "Corrective Actions" has been signed-off as completed, by a licensed electrical contractor, the home is automatically re-rated at the respective lower risk. It is up to the customer to present this document to their insurance provider.
